Important FM60-VSAT Service Provider Addendum
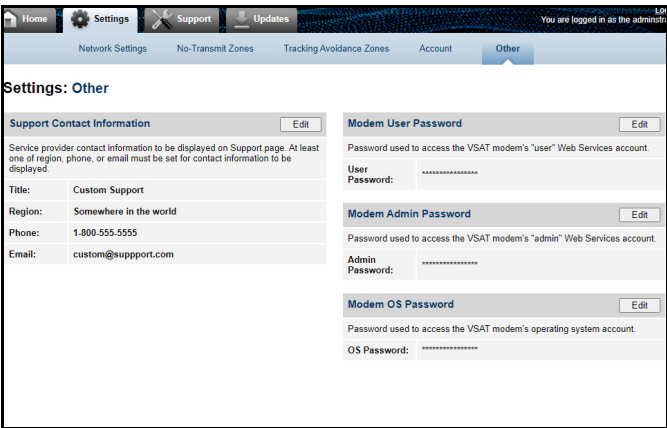

Service Provider Settings

To access service provider settings in the ICM's web interface, follow these steps:

1. At the **Settings** page, select the **Other** tab.

2. Click the Intelsat logo five times.

3. Update the contact information for tier-one support and set the modem's user, admin, and OS passwords.* Then restart the system.

NOTE: The default admin password of the ICM is "password."

* If you do not enter tier-one support information, the Support page will not display contact details.

Modem Configuration Instructions

To configure the modem, follow these steps:

1. Connect your computer to the ICM's User Ethernet port 1 or 2 (see Figure 2).

2. Open a web browser and enter the modem's IP address. The default is **192.168.1.1**.

3. At the modem's login page, enter the admin credentials. The default settings are as follows:

   • User Name: **admin**

   • Password: **iDirect**

4. Upload your network's configuration files and any firmware update files to the modem.

Figure 2: ICM Port Configurations

ICM Port Configurations

The ICM's Ethernet ports are configured as follows by default:

Port	Configuration

User Ethernet 1	• DHCP server: Enabled
	  • Default gateway: 192.168.5.1
	  • Netmask: 255.255.255.0
	• ICM interface: 192.168.5.1
	• Modem interface: 192.168.1.1

User Ethernet 2	• Static IP: 192.168.1.9* • Netmask: 255.255.25.0 • ICM interface: 192.168.1.9 • Modem interface: 192.168.1.1
MODEM ETH1	Internet access

* To use this port, the customer must set up a static IP of 192.168.1.10/24.
